

IGOR VASIC

Front-End Developer | Angular & TypeScript | Vue

Belgrade, Serbia | [+381 65 222 88 68](tel:+381652228868) | vasicigorjsp@gmail.com | vasicigor.dev | [LinkedIn](#)

PROFESSIONAL SUMMARY

Front-End Developer with 6+ years of experience working on Angular, TypeScript and Vue applications. Most of my recent work has been on production SaaS and enterprise platforms with complex workflows, REST API integrations and reusable UI components. I use GitHub Copilot, Codex and ChatGPT for debugging, documentation, boilerplate and exploring solutions, but I review, adapt and validate every change before it reaches production.

TECHNICAL SKILLS

Core: Angular, TypeScript, Vue, JavaScript

UI and components: Angular Material, PrimeNG, Bootstrap, Vuetify, HTML5, CSS3, SCSS, Responsive Web Design

State and data: RxJS, Pinia, Vuex, Reactive Forms

APIs and integrations: REST APIs, Firebase, Google Maps API

Workflow: Git, GitHub, Jira, Figma, Agile/Scrum, QA and backend collaboration

AI-assisted development: GitHub Copilot, Codex and ChatGPT; manually reviewed, adapted and validated before production

PROFESSIONAL EXPERIENCE

Front-End Developer | Angular & TypeScript | Jobatory

Sep 2023 - Present

Contract | Long-term, part-time | SaaS product / US market | jobatory.com

- Work across Client, Admin and Super Admin portals used by 500+ service businesses in the US.
- Maintain and extend an existing Angular codebase, including reusable components and onboarding, service-management and operational flows.
- Turn Figma designs and Jira requirements into responsive features connected to REST APIs and RxJS data flows.
- Fix production issues and take part in estimates, code reviews, releases and deployments with the Front-End Lead, Project Manager and backend team.

Stack: Angular, TypeScript, Angular Material, RxJS, Google Maps API, Bootstrap, REST APIs, HTML5, SCSS, Git, Jira, Figma

Front-End Developer | Angular & TypeScript | Protektis

Oct 2024 - May 2026

Full-time | Enterprise application / NDA

- Built Angular features for an NDA-covered emergency operations platform.
- Worked on alarm station control, live incident monitoring, map-based reporting, equipment assignment and role-based screens.
- Implemented responsive PrimeNG screens from Figma and connected them to REST APIs with RxJS, working closely with backend developers and QA.

Stack: Angular, TypeScript, RxJS, PrimeNG, Reactive Forms, REST APIs, HTML5, SCSS, Git, Jira, Figma

Front-End Developer | The Anemone

Mar 2023 - Jul 2023

Vue client projects | Belgrade

- Built and updated Vue components and page sections in existing client projects.
- Handled client-requested changes, bug fixes and responsive issues across desktop, tablet and mobile.

Stack: Vue, JavaScript, HTML5, CSS, jQuery, Responsive Web Design, Git

Front-End Developer - SaaS company | Goxee Dealer Software

Oct 2021 - Feb 2023

Car dealership SaaS platform | Belgrade

- Built reusable themes and page sections for a SaaS platform used to create and customize car dealership websites.
- Adapted branding and content for individual dealerships while maintaining shared components across the platform.

Stack: Vue, JavaScript, HTML5, CSS, jQuery, Responsive Web Design, Git

Freelance Front-End Developer

Feb 2020 - Present

Occasional part-time client work alongside company roles

- Deliver Angular and Vue updates, Firebase integrations, responsive fixes and maintenance for selected clients.
- Built and currently maintain selected public WordPress client websites.

Stack: Angular, TypeScript, Vue, WordPress, JavaScript, SCSS, Firebase, MySQL, Responsive Web Design, Git

PROJECTS

iChief | Personal Project

Mar 2026 - Present

- Building iChief as a personal family organizer for Android, iOS and Web.
- Implemented recipe creation and editing, recipe-to-shopping-list conversion, guest and authenticated shopping, shared lists, invite codes and real-time presence.
- Built offline support using SQLite on native, IndexedDB on Web and a persistent synchronization outbox connected to Firebase.
- Added price tracking, approximate conversion between RSD, EUR, USD and GBP, and localization for English, Serbian Latin, Spanish and German.
- Brought the core recipe, shopping, sharing, price tracking, currency conversion and supported offline workflows to late internal beta.

Stack: Expo, React Native, TypeScript, Expo Router, Firebase Authentication, Cloud Firestore, Realtime Database, Firebase Storage, Cloud Functions, SQLite, IndexedDB, i18next

Success Plan Advisor | Freelance Project

2023 - 2026

thesuccessplan.com

- Added and adjusted Vue features inside an existing application, including component behavior and responsive layouts.
- Delivered client-requested changes while following the structure and conventions already used in the codebase.

Stack: Vue, JavaScript, HTML5, SCSS, Responsive Web Design

Selected WordPress Client Websites | Freelance Client Projects

- Built and currently maintain four public WordPress websites, including responsive pages, plugin configuration and ongoing layout and content updates.

Public work: [Sustainable Development Forum](#) | [Ivan Stapić](#) | [Videl](#) | [Bavaria Rental](#)

EARLY FRONT-END PROJECTS AND INTERNSHIP

Mile Development | *Dec 2021 - Jan 2022* - Refactored Vue/Vuetify interfaces and improved component behavior and UI consistency.

GVISP Inc | *Feb 2021 - Apr 2021* - Worked on a mobile-first SPA with authentication, product listings, CRUD flows and responsive layouts.

ENON Solutions | *Nov 2019 - Jan 2020* - Completed a full-stack internship project using Vue and MySQL, including CRUD functionality and image uploads.

EARLIER TECHNICAL BACKGROUND

Borland Delphi desktop application development.
